VOX STELLARUM: OR, A LOYAL

ALMANACK

For the Year of Human Redemption

1816,

Being the Bissextile or LEAP-YBAR,

And the 56th of the Reign of His present Majesty;

IN WHICH ARE CONTAINED

All THINGS fitting for such a WORK; as,

A Table of Terms and their Recurns;

The Full, Changes, and Quarters of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS;
and other fixed Stars of Note; the MOON's Age; and

TIDE TABLE fitted to the Same;

The Rising and Setting of the SUN; the Rising, Southing and Setting of the MOON; Mutual Aspects; Monthly Observations; and many other Things, useful and profitable.

UNTO WHICH ARE ADDED,

Astrological Observations on the Four Quarter of the Year

A remarkable CHRONOLOGY; the ECLIPSES.

And other MATTERS both profitable

Observations on the Weather and Weather Glasses, Ross, And an HIEROGLYPHIC adapted to the Time S.

By FRANCIS MOORE, The Clark

London.

THINTED FOR THE COMPANY OF TATIONOSE

TO THE REPORT OF THE VALUE OF THE PROPERTY OF

By William Thorne, Red Lion Court, Fleet Street.

And Sold by GEORGE GREENHILL, at their Hall in Ludgate Street

Price Two Shillings and Three Pence statched.

IN the Beginning, The ALMIGHTY said,
"Let there be Light!" that Instant Darkness fled;
All radiant Day her rosy Beams display'd,
And the young World in splendid Dress array'd.
The blazing Sun, uprising from the East,
Like a young Bridegroom in his Glories drest,

Monthly Observationsi

Rain fallen in Feb. 1814, at Carlisle, was a little more than One Inch. The Nights this Month were generally frosty; and much Snow fell on the 6th Day.

FIRST Quar, 6 day, at 1 aftern.

Rain or Snow, more or less, may he expected about the 4th, the 9th, the 25th, and the 28th Days of this Month.

FULL Moon, 13 day, at 12 noon:

Month, when there might, according to my Astrological Rules, come some Rain or Snow, according to the Scason of the Year, and that within a Day or Two, as I always mention the LAST Quar. 20 day, at 4 more

Middle Day. I do this by way of Amusement to the Curious, as well as for the Use of Farmers, Graziers, and others, to be classed with their Weather Glasses. But I do not mean those Weather Glasses that are hawked about the Country,

NEW Moon, 28 day, at 4 morn.

VENUS is a Morning Star till August 1; and then an Evening Star to the End.

Around his Orb harmonious Planets race, By his Attraction mov'd thro' boundless Space; With these the Earth upon its Axle turns, And, justly pois'd, supporting Pillars scorns. The Sun, preserving thus his central Seat, Spreads thro' all Nature a prolifick Heat,

Monthly Observations.

Rain fallen in March, 1814. Carlisle, was nearly One Inch. This Month, from the beginning to the 21st, a Succession of severe Frost; and such extreme Coldness for these three Months, quite unprecedented in the Climate of England.

FIRST Quart, 7 day, at 5 morn.

Rain or Snow, more or less, may be expected about the 4th, 15th, and 28th Days of this Month.

FULL Moon, 13 day, at 10 aftern.

as they are generally worth but little, and are not to be depended upon. If any Person wants a good Weather

LAST Quar. 20 day, at Caftern.

20 Glass, or a Thermometer, I advise him to buy of People that understand the Theory, as well as the 59 making of them, and that in the best 45 Manner.

52 NEW Moon, 28 day, at 9 aftern.

He brings her endless Offspring to the Birth, And makes a teeming Mother of the Earth— Who thro' the Zodiack takes her annual Way, To settle Seasons and to measure Day; To portion out the Year to every Clime, And add just Periods to the Length of Time.

Monthly Observations.

Rain fallen in April 1314; at Carlisle, was 4 Inches and 3 Tenths. This Month proved pretty fine, yet we had some very heavy Rains during the Month.

FIRST Quar. 5 day, at 4 aftern.

Rain or Sleet, more or less, may be expected about the 3d, 12th, and 27th Days of this Month.

FULL Moon, 12 day, at 7 morn.

Courteous Reader,

HERE now follow my Monthly Astrological Observations and Predictions, relating to the Political Affairs of the World.

LAST Quar. 19 day, at 10 morn.

The Configurations of the Planets at the Brumal Ingress, and those of late, shew that the general Affairs of many States and Kingdoms have been involved in a deplorable Condition; and I fear are not yet quite settled, with respect to Ease and Tranquil-

NEW Moon, 27 day, at 2 afternlity. God direct the Affairs of the Prince Regent of Great Britain, and prosper His Most Honourable Each Nation owns the Sun a needful Friend,
And on his Influence all Mankind depend;
In Indian Mines he ripens the rich Gold,
And charms the World with the dear glittering Mould;
From the bright Radiance of his orient Beam,
A Lustre's added to the glorious Gem:

How to fet a Clock or Watch by this Table. For Example, Jan. the 1th, I find, by looking into the Table, that a Clock to be right must be 3 Minutes 35 Seconds faster than a Sun Dial; therefore I fet it to much faster accordingly. And so of the rest. Twelve o'Clock is the best Time to set a Clock or a Watch by a Dial.

Note, A Sun Dial shows Solar or Apparent Time, but a Clock, &c should be set to Equal or Mean Time, as the Table directs, to go true.

A TABLE of the Rising, Southing, and Setting of the Pleiades, or Seven Stars, for every 5th Day in the Year, of excellent Use to find the Hour of the Night.

Peace (Dec. 24) between Gt. Britain and America

1789, FRANCE revolutionized; 1792, a Republic .- 1793, its King and Queen guillotined. - 1799, Buonaparte First Consul. - 1801, Peace of Amiens. - 1802, Buonaparte Conful for life. - 1803, War with France renewed. - 1804, Buonaparte Emperor - 1805, Battle of Trafalgar-1806, Joseph Buonaparte made King of Naples, and Louis King of Holland.—1807, Treaty of Tilsit; Louis xvIII. arrived in England.— 1308, Joseph Buonaparte made King of Spain; Rome united to French Empire. - 1809, Buonaparte repudiated his Wife. - 1810, Buonaparte married Maria Louisa of Austria; Louis King of Holland, abdicated .-Holland annexed to France, -1811, The Ex Queen of France died. 1812. War between France and Russia; Battle of Borodino; Moscow burnt; Retreat and Destruction of the French. - 1813, Alliance of Russia, Prussia, Austria, and Sweden, against France; Battle of Leipsic; British I roops under Marquis of Wellington, entered France; Counter Revo ution in Holland; Recal of the Prince of Orange, -1814, Ailied Armies invaded France; Peace between Great Britain and Denmark. Murat, King of Naples, joined the Allies; Battle of Montmartie, and Capitulation of Paris; Buonaparte abdicated; Recal of the Bourbons; Louis xvIII. made his public entry into London, and three days after embarked; Ferdinand the vii. returned to Spain; Buonaparte conveyed to Elba; Defin. Treaty of Peace signed at Paris; Emp. of Russia, King of Prussia, &c. visited the Court of London; Peace proclaimed; General Thanksgiving, Royal Procession to St. Paul's; Centenary Jubilee in St. James's and Hyde Parks; Chas. x111. of Sweden assumed the Crown of Norway; Congress assembled at Vienna; Hanover raised to a Kingdom, under the Crown of Great Britain; The Pope reinstated; Inquisition revived; Order of Jesuits restored; The Popeagain forced to flee; Peace between Great Britain and America .- 1515, Conspiracy in France; Hostile Return of Buonaparte, and Departure of Louis xvIII; Murat defeated and dethroned; Restoration of Ferdinand King of Naples, and of Pius VII.; Memorable Battle of Waterlos; Surrender of Paris to the British and other Allied Forces; Return of Louis XVIII, to his Capital: Surrender of Buonaparte to an English man of war, the Bellerophon, off Rochefort; and is e iled to St Helena.

AN ACCOUNT

ECLIPSES of the SUN and MOON,

And other Appearances in the Heavens,

Calculated from New and Improved SOLAR AND LUNAR TABLES,

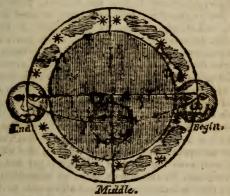

Founded on the NEWTONIAN System of Gravitation;
And agreeing with Observations to a surprising Exactness.

IN this Year there happen Two Eclipses of the Sun, and Two of the Moon; one of the Sun, and the Two Eclipses of the Moon, will be visible in our Hemisphere. They occur in the following Order, according to my Calculation.

The FIRST is a Solar Defect, upon Monday the 27th of May, about our three o'clock in the morning, consequently invisible, not to us only, but even to all Europes But in the unknown Southern parts of the world, it will be a very great Eclipse; for in 58 degrees 52 min. of South Latitude, and 138 degrees 26 minutes of East Longitude from London, viz. in the Great South Sea, the Sun will be centrally eclipsed in the Meridian, that is, at noon-day; it will not be total, but annular; a bright Circle will appear quite round the Sun, beautiful to behold. This place falls near Captain Cook's track in his Voyage round the World in 1775, to the Westward of the island of New Zealand. This Eclipse will be visible (more or less) at New Zealand and New Holland, and along the coast of New South Wales; and therefore visible at Botany Bay and Port Jackson.

The SECOND is a Total Eclipse of the Moon, on Trinity Sunday, the 9th of June; and if the Air prove favourable, may be seen by us in this Kingdom, and not by us only, but also by the inhabitants of all the States and Kingdoms in Europe and Africa, together with the Western parts of Asia, and the East parts of America But in Siam, China, Chinese Tartary, &c. in the Eatern parts of Asia, the fore-part only will be visible; the Moon setting with them before the Eclipse be over. It will be all visible in South America; but the Moon

will rise eclipsed in North America, as appears by considering her position in respect to those parts of the earth, during the time of the Eclipse; for at its beginning, the Moon will be vertical, or right over-head at midnight, under 23 deg. 8 min. of South Lat. and 6 deg. 22 min. East from London: At the time of the middle she is vertical, under 23 deg. 19 min. South Lat. and 18 deg. 49 min. West from London. At the end of the Eclipse she will be vertical, under 23 deg. 28 min. South, in Long. 44 deg. 15 min. West from London. All this falls in the Great South Atlantic Ocean.—With us in Great Britain, it may be expected nearly to correspond with the following Type and Calculation.—The Time of this Eclipse will be 5 min. sooner at Oxford than at London; and at Grantham and Lincoln, about 2 min. sooner.

June 9th. Ap. Time.	London.		Edinburgh.
Beginning	h. m. s. 11 30 18	h. m. s. 11 25 47

Duration of Total Day			

N. B. The time at Cambridge and Royston, the same nearly as Landon.

The

The THIRD is a notable Eclipse of the SUN, upon Tuesday the 19th of November, in the morning; visible

in these parts of the Globe.

It will be first seen to begin upon the vertical point of the Sun's periphery at his rising, in the Great Atlantic Ocean, in 47 deg. 55 min. of North Latitude, and 10 deg. 51 min. West from London, which place is about 4 deg. to the West of the island of Ushant, near the French coast.

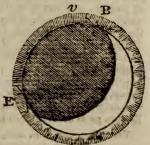

The central Eclipse begins in 66 deg. 18 min. North-Latitude, and Longitude 0 deg. 15 min. East from London, near the Arctic Circle, and, directing its course. towards the South-east, it passeth over some parts of Norway, the coast of Sweden, near the Categat; then. crosses the Baltic, and the island of Bornholm, and enters Pomerania; it then passes over some parts of Poland, Hungary, European Turkey, and, entering the Black Sea, the Sun is there centrally and totally eclipsed at Noonday, in Latitude 43 deg. 24 min. North, in Longitude 29 deg. 42 min. East from London, which place is about. 150 geographical miles N. N. E. of Constantinople. Leaving the Black Sea, it enters Asiatic Tartary, crossing that country into Persia; bending its course more Northerly, it passes over the Northern parts of Hindoostan, into the great empire of China, where the central shade quits the earth with the setting Sun; which place falls in the great. Desert of Coli, in Latitude 35 deg. 55 min. North, and in 83 deg. 10 min. East from London. Through all which tract the spectators will be involved in a kind of gloomy. darkness, even like that at midnight, but not of long. continuance, for the Moon's apparent diameter only exceeds the Sun's diameter by about 46 seconds at its greatest altitude, and in the Horizon about 27 seconds; however, the Eclipse will be total all along the central track, .. and for some distance on each side of it. The whole penumbra leaves this terraqueous Globe in Lat. 13 deg. 20 min. North, and 73 deg. 26 min. of East Longitude from London, namely, in the Arabian Sea, not far from the Malabar coast in the East Indies, where the Eclipse, will be seen to end upon the vertical point of the Sun's disk, at his setting. This Eclipse will be visible to all Europe, the Northern parts of Africa, and the Western parts of Asia.

The

The Appearance of the Sun, at the Middle of the Eclipse.

The adjoining Tyle, adapted to London, may, without sensible error, serve all parts of the united kingdom, the quantity of light excepted; and that may be nearly estimated from the subsequent calculations.

Note — v, the Sun's Upper Limb; B, the place where the Eclipse begins; E, where it ends.

Nov. 19th, Morn.	1 L	London:		York.			Edinburgh.		
App. Time.	h.	m.	S.	h.	m.	S.	h.	m.	S.
Beginning	8	18	23	8	15	0.	8	7	0
Visible Conj	. 9	19	49	-	-		-	-	-0
Greatest Obscuration .	9	23	51	9	18	30	9	10	15
End	10	33.	50	10	29	30	10	20	11
Digits eclipsed	99	23	37	90	59	51.	100	6	4

N. B. At Greenwich and London, the Moon will be observed to make the first impression on the Sun's disk, at 18 deg. 19 min. from his vertex on the right hand, according to the above delineation, and the Eclipse begins accordingly, which at London is at 18 min. after 8 o'clock; the greatest obscuration will be at 24 min. past nine. In viewing the Sun, I would advise those that have not got proper Telescopes; to use a dark glass, or a piece of window-glass smoked over the flame of 2 candle, as the best security to their eyes. This is the greatest Eclipse of the Sun we have had in England since the year 1793, which happened on the 5th of September.

—There will be another great Eclipse of the Sun, visible in England, in the year 1820, in the month of September also.

The FOURTH and last of these Eclipses is a partial and visible one of the Moon, upon Wednesday the 4th of December. At the time of the greatest obscuration, the Moon is vertical to the Sandy Desert of Arabia, in Asia, under \$2 \text{deg. 53 min. of North Latitude; and 48 deg. 52 min.}

of East Longitude from London In this Desert, the Arabs remove from place to place, partly for the sake of pasture, and partly to lie in wait for the caravans, which they often rob, when travelling over this part of the Desert from Bassorah to Aleppo, and from Egypt to Mecca, in order to visit Mahomet's tomb!—It appears that this Eclipse will be visible in Africa, the island of Madagascar, all the lesser isles of the Eastern or Indian Sea, in Sumatra, the empire of the Great Mogul, Arabia, Persia, all Europe, Iceland, Greenland; but the Moonwill only rise eclipsed in Newfoundland, and also to the Eastern parts of both North and South America.

The time, duration, and quantity of this Eclipse may be expected nearly to correspond with the following Calculation.

The TYPE for LONDON.

			Edinburgh.
App. Time.	h. m. s.	h, m. s.	h. m. s.
Beginning	7 15 20	7 10 49	7 2 31 (Past p
Middle	8 44 25	8 39 54	8 31 36 1000
Opposition	8 51 25	8 46 54	8 38 36
End	10 13 30	10 8 59	10 0 41

N. B. The time of this Eclipse will be nearly the same at Cambridge and Royston as it is at London, both being

an camprings and hopsen meridian. At Oxford it will be 3 min. sooner than at London.

Other

Other Appearances in the Heavens.

1. That beautiful Star, the Planet JUPITER, comes to an Opposition of the Sun this year, on the 25th of April; hence, for that month, and some time to come, is a proper time, when the evenings are clear, for viewing his Moons, and their Eclipses, and their Configurations amongst themselves.

2. The Planet SATERN will also come to an Opposition of the Sun, about the 13th of August; when it will be a proper time, should the Sky be clear, to view his wonderful Ring. But this requires a good and powerful Telescope. When these Planets are in an Opposition to the Sun, they are then nearer the Earth than at other times.

Judicium Astrologicum pro Anno 1816.

Vox Colorum, Vox Dci: The Voice of the Heavens is the Voice of God.—He speaks in all the Changes of the Seasons, and of the Times.—Gen. i. Ps. xix.

To the Courteous Reader.

My Friends and Countrymen,

OR some years past my mind has been much affected by the great events that have turned up in various parts of Europe; for, ever since that great and wonderful Revolution, which took place in France about the year 1789, great troubles and distresses have ensued, by the cruel ravages of war, the flames of which, like a whirlwind, have passed through and rent many States and Kingdoms, even to their very foundations; Thrones have been overturned, and Sceptres broken; and it is out of the reach of Human Wisdom to ascertain, what may yet be the consequences of these great and wonderful changes, and the extent thereof. God's Judgments are still abroad in the earth; I wish the people and their Rulers, in all countries, would take warning thereby. Britain has hitherto been preserved by the Goodness and Mercy of God; and I hope that the preservation of Divine Providence will still be continued to my pative land and country. The Hand of God seems

to be in all these changes and events, in order to bring about a reformation in all nations, and also of the corrupt part of the Christian World, and to operate as the discipline and trial of, all the rest. Notwithstanding our Peace, new and great events have and are still turning up, which are pregnant with apprehension and alarm!

alarm!
The late splendid COMET, in an Astrological Sense, was a foregunner of great events in the world, and signified the downfal of some tyrannical governments, together with the superstition and pride of Rome; for, according to the Scriptures, Popery must go down, and religious and civil liberty take its place. But allthis will be a work of time. It is begun. NAPOLEOM BUONAPARTE had a Comet in the 10th House of his Nativity, which denoted, with other Configurations of the Planets, that this man, so born, would act his part upon the stage of the world with such success, that it would not be very easy to overturn and stop his progress as a General and Commander. - However, this man, a few months ago, was forced, on condition, to abdicate the Throne of France; but since then he again returned, in order to finish and conclude that course which Providence has laid out for him. There was something in this event rather singular and wonderful, for he was received in France with open arms! But it is no more than what might have been expected. Yet, from his want of success, he has been forced a second time to abdicate, and is now sent into perpetual Banishmeut.

But unto Goo we will leave the Event, Who rules the Stars,* which he for Signs hath sent, And makes them fight in the Defence of those, That in their Goo doth their whole Trust repose.

I say it is impossible to look back upon all these wonderful changes and scenes, without observing the Operations of the Hand of God therein, in order to bring about the reformation of Europe.—I shall now exhibit to my Readers, an HIEROGLYPHIC, alluding to these present Times: Hieroglyphics were much used by the Ancients, to express their morals, both Divine and philosophical. I shall omit the deciphering of these Characters, as they

relate to a view of mundane transactions, the rather leaving them to time and the curious to construe.

OBSERVATIONS upon the Four Quarters of the Year, as deduced from the Influx and Influences of the Planetary Orbs, operating therein.

Of the Brumal Ingress, or Winter Quarter.

IT is both customary, as well as necessary, to begin with this Quarter, as it all falls within the New Year, excepting a few days; and it takes place at that moment of time, when the Sun (according to appearance) enters the Tropical Sign Capricorn, which he will do on Friday the 22d of December, 1815, at 46 min. past three o'clock in the afternoon. At this time, the last degree of II is ascending in the East, and 24 deg. of are on the Mid-heaven, or where the Sun is at 12 at Noon. The Moon is under the Earth, departing from a Sextile aspect of Venus, and a Square aspect of Mercury. The Planet Mars is strong, in his own house and dignities, located in the 11th. The Planet Saturn is in the 9th, in a Square of Venus. The Sun is going down in the West; and the Moon, with Jupiter, Venus, and Mercury, are all under the Earth. These are the prin-

cipal configurations of the Planets at this Tropical ingress. My readers, no doubt, are now in expectation of what I shall say, respecting these eventful times, andthe politics of Europe, &c. Of late years, many remarkable things have been turning up, and many strange occurrences have taken place; and very recently, amongst the rest, the return of NAPOLEON BUONA-PARTE to the Throne of France, which excited no little agitation amongst most of the Powers of Europe: And I expect, from the configurations of the Planets at this ingress, as well as from the ensuing visible Eclipses of the Sun and Moon, that some further remarkable events. will follow; some of which have lately taken place, and others are now on the Anvil of State. Many eminent Councils, and great Consultations, are secretly carrying on in the Cabinets of Kings, Princes, and other Potentates. The French nation, ever since the departure of their late Emperor, is much disturbed and perplexed by civil broils and internal commotions, fermented by foreign powers! This, I am afraid, is still likely to continue. O that they would consider the great. evil there is in war! that formidable scourge with which Gop often chastises sinful nations; it is, considered in itself, a diabolical work, which ravages the fair face of God's creation, and hurls destruction among the noblest of his creatures in this world. The abettors of this evil will surely have to answer for it hereafter. How blind the politics, how infatuated the People, that can make war palatable to the taste!-The influences and effects of the planets at this time, together with the 8 of 24 and 3, and the of by and d, now coming forward, will afflict several parts. of Germany, together with France, Holland, Portugal, Spain, and Italy. Some of the European Powers are still. active, and I expect will be more so in the Spring following: at present, they seem consulting and concerting such ways and means, as will, in all probability, expedite and hasten some important event; and I am sorry to find England is in some measure connected therewith, to her detriment and loss; for I see she will suffer in some degree, from the insults of open enemies, and the perfidy of pretended friends, but will triumph, I hope, in the end over both, as appears by the positi onos

Mars, the proper Significator of England, being strong, in an astrological sense, in the 11th House of the Figure set for this Ingress. Notwithstanding, there will be, as usual, great complaints of heavy Taxation, with murmuring and repining against Men in Authority.

Of the Vernal, or Spring Quarter.
The Grand Radia of the Sun's Return into Aries.

THAT glorious Luminary, the Sun, is the Fountain of Light and Life; to him we chiefly owe the variation of the Seasons. He will now cross the Equinoctial Line, and display his genial influence on us in these Northern regions, by entering the celestial Sign Aries, which this year he will do on Wednesday the 20th of March, at 9 minutes past 5 in the afternoon; at which Time, 21 deg. of my ascend the Eastern Horizon, and 18 degrees of II culminate. The SCHEME above displays the face of the Heavens and planetary Positions at that lime: The Dad Do, et ad * &, et * 24.—I now come to consider, from the Planets, as secondary Causes, what will probably be transacted upon the Stage of I urope, together with the connection of Great Britain therewith, At this Ingress, all the Planets are under the Earth, except the Sun and Mars; the Sun is in the Western Angle, and Mars is in the 9th House. It therefore seems to me,

from this figure, that some occurrences of moment will take place during this year, and are even now on the anvil of State. Many eminent councils, and great consultations are secretly carrying on in the cabinets of Kings, Princes, and great Potentates of the earth. The powers of Europe are much divided amongst themselves, each power seeking its own interest. The French are still active with their sword (if necessary) as well as in their councils. Much liberty, both civil and religious, hitherto unknown, have been given to the French people. And I also think, that some of the powers on the Continent of Europe are much inclined to bring about a reconciliation between the French Nation. and those that are and have been hostile against her. It also appears from the figure, that the people of England have their doubts and fears, respecting some events that have lately taken place in France, Spain, and Holland, as well as in some parts of Germany. The Papistical Clergy, especially the Cardinals, shall be cast down from their dignities; and these shall obtain the revolution of a new Empire, under which shall be administered universal gladness. We shall assuredly find this, as well as the last, a very busy year, in which many notable matters will be vigorously transacted. 'Tis the influence of heaven which instigates and drives on various resolutions in the people in general; and they are ordained by God Almighty, to show that Kingdoms and Commonwealths have both risings and downfalls in the affections of subjects, and that no Engagements hold so long and so firm in the people's affections, as Justice impartially distributed, and a seasonable compliance for the redress of people's grievances. English wisely improve their talents (as there is no doubt but they will) then will their Fame be still more splendid, and England will flourish again and again, which is my hearty wish With us and America, things begin to appear with a better face; and this I am also glad of. May God protect my native Land, and bless the Councils of the Prince Regent with unanimity of Spirit, and sound Judgment! The French, and other Powers, as well as Great Britain, may, I expect, be keeping up some standing forces, as there are still some warlike appearances!

Of the Estival, or Summer Quarter.

THIS Quarter begins when the Sun enters the North ern Tropic, or the Sign Cancer; which, according to my calculations, will be, this year, upon Friday the 21st day of June, at 45 min. past two o'clock in the afternoon; at which time. 9 degrees of a are upon the medium coli, and 29 degrees of are ascending in the East. The D ab o &, et ad * &. The Planet Jupiter in the ascendant retrograde, the Planet Mars in the 9th, moving rapidly to an Opposition of the Planet Saturn, who is under the Earth, retrograde, as if endeavouring to move from him; the direct opposition of these two Planets will not take place until the 18th of July, yet their influences will soon begin to act. The Moon is posited in the West-ern Angle of the Figure, departing from a square aspect of Mars, and next applying to a Sextile aspect of Mercury, posited in the 9th House; Jupiter and Mars have lately been in a Square aspect. From all which I infer, that this, like the last, will prove a busy Quarter, and there will be rumours of some approaching troubles in Foreign Countries. But I hope we shall flourish, and remain tranguil, amidst all the changes and alterations, still likely to take place in Europe. I think the Church of Rome is falling to decay, notwithstanding the late propping up, both in France, Spain, and elsewhere. There is in revolutions and vicissitudes of greatness, in various Nations, a something, that must obey the swing of that Wheel, not moved by intelligences, but by the Hand of God, whereby all Estates arise to their zenith or vertical point, according to their predestinated periods. We have seen the Funerals of the greatest Monarchies, the posthumous Rubbish of mouldered Cities, and the dreadful Carnage of numerous Armies; the effects of the ratified Decrees of the stubborn Destinies.

> 'Tis God that guides the motion of the Stars, In mercy gives us Peace, in judgment, Wars; Baffles the Politician's grand design, And worldly projects oft doth undermine: To His rebuke great Conquerors do bow,* It is His hand above rules all below.

[•] Napoleon Buonaparte for one; and his restless Power has been eclipsed!

Of the Autumnal Quarter.

THIS Quarter takes place when the Sun, according to appearance, enters the Equinoctial Sign a, and then crosses the Line in his way to the Southern regions, until he arrives at the Tropic of Capricorn, when the Winter Quarter begins. This Autumnal Quarter will take place on Alonday the 23d day of September, at 43 min. past 4 o'clock in the morning, when 16 degrees of m ascend, and 12 degrees of II are on the Mid-heaven. The Dab of g, et D of b, ad o g. The aspects of note in this Quarter are, a of h and &, and a & of 4 and 3; and on the 29th of October there happens a Square aspect of SATURN and JUPITER from m and ... At the time of this Ingress, the Sun and Mars are in the ascendant, afflicting each other; Venus, the Moon and Mercury, near each other in the 2d House; all the Planets are under the Earth at this Ingress. This Quarter, like the foregoing, will produce some particular occurrences, both in France, Spain, Italy, and some parts of Germany. There is a restless party, who will stir up Broils and Contentions. There is a race of men in the world, who will bear no restraint or controul, though they be promoting the most unjust and illegal attempts. But the time is approaching, when tyrannical Governments must come down; when the power of the motley Leopard, the Dragon, and such like Beasts of Cruelty, will no longer prevail. The noble House of Austria will recover much from her hereditary Enemies; a great General stoops to Fate! Death alone convinces us that all Men are Vanity!

Nations in Trouble, like to Ships distress'd, Often, by those should Help them, are oppress'd. Those who, with Hands unbrib'd, and Heart sincere, 'Twixt Prince and People in a Medium steer, Preserve that Balance which supports the State, And make the People safe, and Monarch great; But those who live on Wrecks, calm Weather hate, Because they gain the most when Storms are great.

FINIS.

Printed for the COMPANY of STATIONERS.

BEES.

A Treatise on the Nature, Economy and Practical Management of Bees. In which the various Systems of the British and Foreign Apiatians are examined, with the most improved Methods laid down for effectually Preserving the Lives of the Bees. Containing also an accurate Description, illustrated by Plates, of the Hives invented by Lombard, Ducouedic, Huber, Vicat, L'Abbé della Rocca, and other Foreign Apiarians, and of a newly invented Hive for the Purpose of depriving the Bees of their Honey with safety

and expedition. Forming the most complete Guide to the Study and Management of those valuable Insects. By Robbut Huisi, Member of the Imperial Apiarian Society at Vienna, &c. In One Volume, 8vo. Price 12s, in boards.

DISEASES OF HORSES.

Every Man his own Farrier, or, the whole Art laid Open; the 22d edition, entirely re-composed, and incorporating the valuable Improvements of many Years extensive Practice, with upwards of One Hundred New Recipes, never before published, and a much enlarged Appendix on the Quality, Composition, and Preparation of the various Medicines. By Francis Clater, Farrier, Cattle Doctor, and Druggist, at Retford. In 8vo. Price 9s. extra boards.

*** The extraordinary demand for this publication is the surest criterion of its real utility. The true Description of every Disorder, and the invaluable Recipes for their Cure; the Method of Preparing and Compounding the various Medicines, and the useful Remarks on applying them, have been tried, approved, and met with unexampled success throughout the United Kingdom.

DISEASES OF CATTLE.

Every Man his own Cattle Doctor, or, a Practical Treatise on the Diseases and Cure of Oxen, Cows, and Sheep. Observations on the Parturition of the Cow and Ewe, and that destructive malady the Rot in Sheep, a timely attention to which has in many districts been the means of saving many thousands from that hitherto considered fatal Disease, By Francis Clater. The fourth edition. In 8vo. Price 10s, 6d.

THE HORSE.

An Inquiry into the Structure and Animal Economy of the Horse;

comprehending the Diseases to which his Limbs and Feet are subject, with proper Directions for Shoeing; and pointing out a Method for ascertaining his Age until his Twelfth Year. To which is added, an Attempt to explain the Laws of his Progressive Motion, on Mechanical and Anatomical Principles. By RICHARD LAWRENCE, Veterinary Surgeon, Birmingham. A new edition in royal 8vo. with numerous Plates. Price 11, 1s.

DRAINING.

Elkington's System of Draining Lands, (for the Discovery of which 1000l, was bestowed by Parliament) with many Plates, 2d edition, 8vo. boards. Price 12s.

LIVE STOCK.

By J. Publips: corrected by C. Surman, Surveyor. Price 4s. sewed.

BUILDER'S CALCULATOR.

The Builder's Assistant, and Complete Ready Reckoner; comprising a New System of Duodecimal Arithmetic, or Cross Multiplication; exexplained in so familiar a manner, that any Person acquainted with the common Rules of Arithmetic may teach hizself without Assistant A

sistance; every Example being worked at length. Also a variety of newly constructed Tables, showing the Amount of any Number of Feet and Inches, Yards and Feet, and Rods and Feet, at any given Price. By Thomas Lovelle, Building Surveyor, &c. Huntingdon Price 6s.

** This Work is intended not only for the easy Calculation of Artificers; but for the Use of the Employer in checking their Accounts.

LAW OF TITHES.

The Principles of the Law of Tithing, intended not only for Professors of the Law, but for all Persons interested in Tithes; and illustrated by references to the most leading and recent Tithe Cases. By PLOWDEN, Esq. Barrister. In a large Volume, royal 8vo. Price 18s.

LAND STEWARD'S COM-PANION.

The Land Valuer's Assistant, heing Tab'es on an improved Plan for calculating the Value of Estates. By R. Hudson. A New Edition. To which are added, Tables for reducing Scotch, Irish, and Provincial customary Acres to Statute Measure; neat pocket size. Price 4s. half-bound.

RURAL SPORTS.

A Supplement to the Rural Sports, by the Rev. W.B. DANIEL; being the 4th Volume of that Work. Comprising, among other matter, Remarks upon, and Anecdotes of, the Fish, Beasts, and Birds, that at all interest or are searched after by the Sportsman. Printed uniform with the former Volumes, and embellished with a fine Portrait, and other Plates, by Tonkins, Landseer, &c. Price, in royal octavo, 2l, 2s, extra boards; demy quarto, 2l, 12s, 6d, ditto; medium drawing ditto, 3l, 6s, ditto; inperial quarto, 4l, 14s, 6d, ditto;

FARRIERY.

A complete Treatise on Veterinary Medicine. By James White, of Exeter, late Veterinary Surgeon to the First, or Royal Dragoons. Illustrated with numerous Plates. In 4 vols. 12mo.

*** The first three volumes of this work have been some time before the public, whose approbation has been most unequivocally testified by the numerous editions through which they have passed: the fourth is now ready for publication. They are sold separately, and the following are the subjects they embrace:

Vol. I. price 7s., containing a Compendium of the Veterinary Art, or an Accurate Description of the Diseases of the Horse, and their Mode of Treatment; the Anatomy and Physiology of the Foot, and the Principles and Practice of Shoeing. With Observations on Stable Management, Feeding, Exercise, and Condition.

Vol. II., price 5s., containing the Materia Medica and Pharmaco-

pæia.

Vol. III., price 6s., containing Practical Observations on some important Diseases of the Horse, with Precautions to be observed in purchasing Horses.

Vol. IV., price 6s., Observations on the Discuses of Cows, Sheep, Swine, and Dogs. Also particular Directions for performing the most important Operations in Farriery, &c. &c.

HINTS FOR FARMERS,

Hints on Agricultural Subjects, and the best Means of Improving the Condition of the Labouring Classes. By J. C. CURWEN, Esq. M. P. 8vo. Price 9s. boards.

FARMER'S ACCOUNTS.

The Farmer's Account-Book, and Daily Journal, for Fifty-two Weeks: being the Pian adopted by the most approved Agriculturists. The whole Volume half-bound. Price 10s. 6d.; or for a half-year, 6s. 6d.

GRAMMAR OF AGRICUL-TURE.

Dickson's Grammar of the first Principles of Agriculture, intended lefty for the use of Young Persons, as a Branch of liberal Education, illustrated by eleven Engravings. Price 5s. bound.

THE WEATHER.

Researches about Atmospheric Phenomena, By Thomas Forster, F. L. S. The Second Edition, greatly enlarged. Price 10s. 61.

*** This Edition contains a Series of Plates, illustrative of Mr. Howard's Nomenclature of the Clouds and other Atmospheric Phenomena. The want of such a Nomenclature has rendered all descriptions of Atmospheric appearances unintelligible or indistinct. It is hoped, therefore, that this attempt to lay down some general rules for Observers may be found extremely advantageous to the Painter and Engraver.

TRADESMAN'S POCKET DIC-TIONARY.

Crosby's Merchant's and Tradesman's Pocket Dictionary, adapted to Merchants, Mannfacturers, and Traders, in all the various Branches of Commercial Intercourse; with a correct Map of England and Wales; and a Commercial List, containing the Market Towns with their Market Days, Fairs, Distances, Bankers, London Agents, and Rates of Postage. By a London Merchant. New Edition, in a thick Pocket Volume. Price 9s.

"This Work is truly a mine of Information; every Mechanical process is distinctly stated; and every Law, which has any reference to Trade, is explicitly land down and divested of its Professional Jargon, To any Youth, entering upon the vast Theatre of Commerce, this Book must be Invaluable; and on the Desk even of the experienced Merchant, it will be found particularly Useful."—Tradesman's Mag. Dec. 1813.—See also Anti-Jacobin Review, Oct. 1808; Monthly Review, August; and British Critic, Oct. 1812.

TRAVELLER'S COMPANION.

Crosby's Complete Pocket Gazetteer of England and Wales; forming a Traveller's Companion on a new Plan. Arranged under the various Descriptions of Local Situation, Public Buildings, Civil Government, Population, Charitable Institutions, Antiquities and Curi osities, Manufactures and Commerce, Navigation and Canals, Mineral Springs, Singular Customs, Literary Characters, Amusements, Parishes, Churches, Fairs, Market Days, Bankers, Posts, Inns, Coaches and Waggons, Distances from London, surrounding Towns, Gentlemen's Seats, &c. A new I dition, carefully corrected and brought down to the present Time. In a Pocket Volume, Price 9s. or elegantly printed on thin Writing Paper, Svo. Price 12s.

Rules for Breeding and Training Colts; with Practical Receipts for Curing the Distempers in Oxen, Cows, Calves, Sheep, Lambs, Hogs, &c. A new Price 2s, boards. Edition.

BOOK-KEEPING.

The Elements of Book-keeping; comprising a System of Merchants' Accounts, founded on Real Business, and adapted to Modern Practice. With an Appendix on Exchange, including the recent Alterations in Foreign Monies. Tracts are likewise added on the Employments and Daties of young Clerks in Banking-houses, Mercantilehouses, and other Departments of Business. By P. KELLY, L.L.D. The Fifth Edition, in 8vo. Price 7s. bound.

** RULED BOOKS, on the best writing-paper, are prepared to correspond with the above Course of Book-keeping; intended for the Convenience of the Teacher and for the Improvement of the Pupil, in the Practical Operations of a Counting-house, or Public Office.

SHORT HAND.

1. Clive's Short Hand, (an Abbreviation of Mayor's System by the application of a new principle,) an entirely new and complete System, perfectly legible, distinct in all its parts, and adapted to every purpose of neat and expeditious Writing; by which nearly one half of the words of any subject may be written, each, with a single stroke of the pen, with one simple rule of Contraction, sufficiently concise to enable the Practitioner to follow a Illustrated by fifteen Plates, containing forty-six sets of progressive Examples. Price 7s. 6d. boards.

2. A New System of Short Hand. by which more may be written in one hour than in one hour and a half by any other published, which is proved by comparison; also a method by which any person may determine, before he begins to learn, if this System will enable him to follow a Speaker. By SAMUEL RICHARDSON, late Teacher at Chester, Liverpool, &c. Fourth Ediz tion. Price 8s. 8vo. boards.

3. The Arcana of Short Hand; or, Expeditious Writing made Easy. By H. EWINGTON. To which are now added, Regular Lessons; for want of which few have gained a perfect knowledge therein .- A new Edition, done up in coloured Paper, with a head of the Author. Price 2s. 6d. sewed.

READY RECKONER.

Collins's Complete Ready Reckoner in Miniature. The most convenient book of the kind ever published; consisting of Tables accurately cast up, adapted to the use of Wholesale and Retail Dealers, the amount of any Number or Quantity of Goods, from one up to ten thousand, from one farthing to one pound, and Tables of Interest, Commission, Brokerage, Weights and Measures, a Correct List of London Bankers, Stamps, &c. Price 1s. 6d. bound, or in calf lettered, 2s.

INTEREST TABLES.

1. Tables of Interest, accurately calculated from 1 to 30001, at five per cent. for one to ninety-six days, and and from one to twelve months.—Ditto of Commission from 1-8th to five per cent. By Thomas Mixchell, Accountant, London. Price 3s. extra boards.

2. Tables of Interest, Commission, Brokerage, and Exchange, at all the usual Rates per cent. on a new and accurate Plan. To which are annexed, a new Table for reducing Interest, a Complete Ready Reckoner, and other Commercial Tables. Dedicated to the Governors of the Bank and Royal Bank of Scotland. By WM. STENHOUSE, F.A.S.E. Accountant at Edinburgh, The Second Edition. Price 11.8s. 8vo. boards.

GRAMMAR OF TRADE.

A Grammar of Trade, Manufactures, and Commerce; containing popular Accounts of all the different Branches of Trade and Manufactures—Definitions of the Various Persons employed in them — Description of the Origin and Uses of Commodities—Vocabulary of Terms used in the different Branches of

Commerce—Tables of Foreign Monies, Weights, and Measures—and Maxims of Experience for Young Tradesmen. By T. Mortimer, Esq. Price 3s. 6d. bound.

GRAMMAR OF LAW.

Goldsmith's Grammar of the Laws and Constitution of England, intended for the use of junior Students. Price 4s. bound.

GENERAL KNOWLEDGE.

Guy's Pocket Cyclopædia; or, Miscellany of Useful Knowledge, from the latest and best Authorities, designed for senior Scholars in Schools, and for young Persons in general; containing much useful Information on various Subjects necessary to be known by all Persons, and yet not to be found in Books of general Use in Schools. By JOSEPH Gov, late Professor of Geography, &c. Royal Military College, Great Marlow. Sixth Edition, on fine paper: with a copious List of Authorities not in any former edition. Price 7s. boards, or 7s. 6d. neatly bound.

"In company, to discover gross ignorance of things becoming one's station in life to know, is insupportably mortifying and degrading."—Anon.

ATLAS.

Ostell's New General Atlas; containing distinct Maps of all the principal States and Kingdoms throughout the World, from the latest and best Authorities, including Maps of Ancient Greece and the Roman Empire; the whole correctly engraved by Russell, upon 30 Plates. In Royal 4to. Price 18s, outlined, or 21s, full coloured and neatly half-bound.

*** The above Atlas is a most useful companion in reading the daily papers, or works of travels, as the Maps bave every Town and Piace of note

in all Countries, but not more names than can conveniently be read, and easily referred to. It avoids the confusion in the larger Atlasses, so much complained of; and it will be found more useful, much more portable, and better calculated for hasty reference on a library or parlour table, than any Atlas hitherto offered to the Public.

GENERAL HISTORY.

Guy's Chart of General History, Ancient and Modern. On a large sheet of Columbier drawing paper, the Third Edition, corrected. Price 7s. coloured; on Canvass and Rollers, 10s. 6d.; and varnished, 14s.

* * * A Chart of this kind will greatly facilitate the Student's progress, and give him clearer ideas of the rise, duration, and fall of each Kingdom and Empire, than the perusal of many volumes. It is, in short, to History, what Maps are to Geography. It is a mode of representation which gives a kind of locality to events; and conveys not only distinct ideas of distinct events in any one country, but the relative occurrences of different nations.

SCOTT'S BIBLE.

The Holy Bible; containing the Old and New Testaments, according to the Public Yersion, with Explanatory Notes, Practical Observations, and Copious Marginal References. By Thomas Scott, Rector of Aston Sanford, Bucks, and late Chaplain to the Lock Hospital. A New Edition, with very considerable Additions, by the Author, 6 vols. 4to. Price 71. 10s.; or on fine royal paper 121. 12s.

A Series of six Scriptural Maps are engraved purposely for the work under the Author's immediate inspection, price 8s. with a Copious Chronological Table; or on fine drawing paper and coloured, price 12s. The Author is at present employed on a Topical Index, or Index of Subjects discussed in the Notes and Practical Observations. This will form a volume in 4to., and will be published as speedily as possible.

BIBLE, WITH PLATES.

2. The Holy Bible; containing the Old and New Testaments, according to the authorised Versions; with Notes by several Learned and Pious Reformers: those on the New Testament being by THEODORE BEZA; as printed by Royal Authority at the Time of the Reformation; with some additional Notes, Dissertations, &c. 4to. Price 31.; or on fine royal paper 41. 16s. Illustrated by 25 beautiful Vignette Engravings and Maps.

** A Family Bible in a moderate compass, and at a reasonable expense, has become a desideratum; and the plan of the present work is such, that it must be an acceptable acquisition to every person who calls himself a Christian, to whatsoever doctrines of our reformed 'religion his opinions may be particularly directed.

Some copies of the Apocrypha have been printed, to match each edition: those for the demy paper, price 7s. and for the royal 12s.
